## Termination Apparatus Prototype

After field testing the Termination Apparatus Prototype, I found I was able to terminate for longer periods of time. Due to the unique design the Termination Apparatus, the Termination Apparatus offered a more comfortable position than traditional methods. The Termination Apparatus allows for greater accuracy and speed along with a neater forming of cables. The first time I used the 'Table' I estimated about a 20% decrease in time to form and terminate a 24 port Cat6 Patch Panel.

The Termination Apparatus is a must have piece of equipment for those who want to increase quality and productivity in the data cabling work place.

Yours faithfully
